Madklubben

My name is Anders Aagaard, and I am the founder and owner of Madklubben. In 2007, I had a dream of creating a restaurant where we made great food at reasonable prices, served in beautiful surroundings by charming and smiling people.

A club for food lovers. Whether it was the CEO or the student, Madklubben should be the place where you could have a wonderful restaurant experience without the fear of breaking into a cold-sweat when the waiter brought the bill.

I wanted to create a culture of dining out in Denmark. Even on an ordinary half-gray Tuesday, when restaurants were often empty in 2007.

Today, my dream has come true. And more. One restaurant has turned into more than 40 across the country. Restaurants, each with something special to offer. So whether you are two or 200 people, we can find a solution that makes sense to you. Additionally, we have two lunch caterings that, like the restaurants, also offer something very different.

Madklubben is not just about food - it's also about people. None of the things we do make sense without good people. That's why we've created a loyalty program for you and your workplace, which can ensure even more good times together.

benefits responsible parties – just to mention a few advantages.

It is easy to get started
